

# Hair Restoration

## # What is Platelet-Rich Fibrin (PRF)?

Platelet-rich fibrin (PRF) is a non-surgical, minimally invasive treatment that uses the body's own growth factors to stimulate hair growth. PRF is derived from the patient's own blood, which is processed to concentrate platelets, fibrin, and growth factors.

## # Benefits of PRF Hair Restoration

1. **\*Natural and Non-Surgical\***: PRF is a non-surgical treatment that uses the body's own growth factors, eliminating the risk of allergic reactions or rejection.
2. **\*Minimally Invasive\***: The treatment involves only a few injections, making it a relatively painless and comfortable procedure.
3. **\*Long-Lasting Results\***: PRF hair restoration can provide long-lasting results, with some patients experiencing improved hair growth for up to 12 months after treatment.
4. **\*Combination Therapy\***: PRF can be combined with other hair restoration treatments such as minoxidil, to enhance results.
